Every effort is made by the PTO to be fair and equitable when considering funding requests. While the PTO would like to honor all funding requests, we have a limited amount of funding to work with. The PTO gives preference to funding requests that will impact as many GE students, families, and faculty as possible, with consideration given to those that provide a longer-term benefit. Every request is considered important, but a requested item or service must advance the PTO's mission to facilitate events and projects that support the educational and social experience of all of our diverse learners.
